Tirando proveito da nuvem para projetos de software

Microatividade 1: Criar uma Máquina Virtual(VM) no Azure

Microatividade 2: Configurar Regras de Rede e Grupos de Segurança no Azure

Microatividade 3: Criar um banco de dados SQL do Azure

Microatividade 4: Conecta-se ao seu banco de dados

Microatividade 5: CRUD em um Banco de Dados SQL do Azure

## **Objetivos da Prática**

- Demonstrar habilidade na criação e gerenciamento de recursos na Nuvem Azure, adquirindo conhecimento sobre a estrutura básica da plataforma Azure;
- Utilizar efetivamente o portal Azure para criar e configurar uma Máquina Virtual(VM), demonstrando compreensão dos recursos e suas funções;
- Configurar regras de rede e grupos de segurança, adquirindo conhecimento sobre a estrutura das regras de rede na Nuvem Azure;
- Importar um arquivo .bacpac para um banco de dados no Banco de Dados SQL do Azure;
- Criar e configurar um aplicativo web no Azure, demonstrando compreensão do mecanismo de hospedagem e implantação de aplicativos web.
